Subject: Shorrocks Hill Site, Formby

Hi Carmel

I have just arrived home to find that I have been called to an emergency meeting tomorrow at 10.00 am so won't be able to attend in the morning with regard to the above site. Mr Pike put it back to tomorrow and obviously I did not know about this meeting until I got home.

All I want Mr Pike to know is that having looked at the revised plans for this site from both myself and Formby Parish Council we welcome the fact that the developers have listened to the various issues raised previously and took on board what has been said and then produced a plan that has incorporated what people have said. The car park and public toilet would be a welcome addition to Formby and go a long way to alleviating some of the problems already in existence.

We intend to put this site forward as a potential site before the steering of group for the Neighbourhood Plan and if agreed would adopt this site in the Neighbourhood Plan.

Kind regards

Cllr Maria Bennett

PS I would also like Mr Pike to know that any concerns I have voiced over the public hearings have not been my own personal view but that of the residents I was elected to represent.

Hi Carmel

After having several discussions late last night with members of the parish council and it may well be that someone from the Parish Council will be in attendance today.

The comments I made yesterday in respect of this site relate to myself as a ward Councillor and not to the Parish Council who will need to discuss this site further as a parish council of which there are 15 members and indeed local residents.

However they would make the following comment

"that the council has moved somewhat towards a position we may be able to support but some concerns remain about this site including ecological issues and the density of any such development. However we acknowledge that both Sefton Council and the developer have in this instance taken our comments on board and we welcome this"
