Technical issues

Sefton Maps has been designed to be used with Microsoft Internet Explorer 4.0 and Netscape 4.0 and later versions. It has not been tested with any other web browsers.

Sefton Maps uses pop up windows, for example to display text information. If you are using anti-pop up software, you will need to ensure this is switched off so that you can view this information.

Sefton Maps uses Java. If there is no map shown in Sefton Maps, you may need to download free software to view the maps. This is the [Java Runtime Environment](#).

Sefton Council do not accept responsibility for any viruses, worms, Trojans or other malicious programs and it is your responsibility to install software to protect your computer from these.

Map Performance

Due to the vast amount of information held on the street works system there may be a delay (sometimes up to 20 seconds) between clicking on a road and the road works appearing. Please be patient. Sefton Council is currently exploring ways of reducing this delay.
