Lydiate Neighbourhood Plan – Regulation 16 Stage

Thank you for your email and links to the draft neighbourhood plan.

United Utilities works closely with Sefton Council to understand future development sites and impact on our infrastructure.

It is important that we highlight that as the water and sewerage company for Sefton, we have statutory obligations which include:

- The right to connect domestic wastewater flows to the public sewer. This includes foul and surface water; and
- A domestic supply duty in respect of public water supply.

United Utilities seeks to work with all parties to ensure all surface water from new development is drained in the most sustainable manner, in line with the surface water hierarchy (see specific comments for more detail).

We wish to highlight our free pre-application service for applicants to discuss and agree drainage strategies and water supply requirements. We cannot stress highly enough the importance of contacting us as early as possible. Enquiries are encouraged by contacting:

Developer Services - Wastewater
Tel: 03456 723 723
Email: WastewaterDeveloperServices@uuplc.co.uk
Website: http://www.unitedutilities.com/builder-developer-planninq.aspx

Developer Services – Water
Tel: 0345 072 6067
Email: DeveloperServicesWater@uuplc.co.uk
Website: http://www.unitedutilities.com/newwatersupply.aspx

It is important that United Utilities is kept aware of any development proposed within your neighbourhood plan over and above the Council’s allocations. We encourage further consultation with us at an early stage should you look to allocate any sites in the future over and above the allocations determined by the council.

Specific Comments

United Utilities recommends additional wording with respect to Surface Water Management. We recommend the following is included in the plan, as a separate policy.

“New development should be designed to maximise the retention of surface water on the development site and to minimise runoff. The approach to surface water drainage should be considered in liaison with the LLFA, the public sewerage undertaker and where appropriate the Environment Agency”.

Surface water should be discharged in the following order of priority:

- An adequate soakaway or some other form of infiltration system.
- An attenuated discharge to watercourse or other water body.
- An attenuated discharge to public surface water sewer.
• An attenuated discharge to public combined sewer.

Summary
Moving forward, we respectfully request that Lydiate Parish Council continue to consult with United Utilities on all future planning documents. We are keen to continue working in partnership with you and Sefton Council to ensure that all new growth can be delivered sustainably.

In the meantime, if you have any queries or would like to discuss this representation, please do not hesitate to contact me.

Kind Regards,

Planning Assistant
